ONE OUNCE TO 25 HILLS.

KLECKLEY'S SWEET.

Kleckley's Sweet. The vines are strong and vigorous and the fruits grow uniformly to quite large size; oblong in form, eighteen to twenty inches long and ten to twelve inches in diameter, rather tapering at the ends. The skin is a rich dark green, flesh bright scarlet, ripening close to the skin, the rind being only about half an inch in thickness. The seeds are white and rather long in shape, being in two rows lying close to the rind, they leave a very large solid heart which does not crack open when ripe, as is the case in many large melons. The rich, bright-scarlet flesh is crisp, sugary, and melting to the highest degree, being entirely free from any stringiness. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.00.

NEW EVERBLOOMING ROSES. Teas and Hybrid Teas.

BALDUIN.

Balduin. (Hybrid Tea.) We believe this one of the best hardy everblooming Roses ever introduced. The color is unique, a very soft intense carmine crimson with deeper shades in the depth of the petals; in color much like American Beauty. The profusion of its bloom is truly marvelous, every shoot producing a flower. A grand addition to our list of red roses and equally valuable for winter forcing or summer bedding. 20c.

Grass an Teplitz. One of the brightest colored roses grown. When first opened it is dark rich crimson, quickly changing to bright scarlet shading to velvety fiery red. Blooms continually; flowers good sized and delightfully fragrant. Plant vigorous and upright grower, making fine pot plants. 15c.

Sunrise. One of the new Tea Roses that has proved to be not only a unique and striking novelty, but is one of the sweetest scented, freest flowering Roses on our place. The outer petals are reddish carmine shading to delicate fawn and pale salmon on the inner petals, the fully expanded flower changing to pure yellow. In foliage and habit of growth closely resembles *Perle des Jardins*. 35c.

Empress Alexandria of Russia.

(Tea.) An exquisite new Rose of a novel and very taking shade. Buds bronzy salmon, open flowers rich red shaded orange and fiery crimson; very large, full and globular. Of vigorous growth and extraordinary freedom of bloom. 25c.

Maid of Honor. A "sport" from that grand pink Tea Rose, *Bridesmaid*. It is a deeper shade of pink, yet rich and glowing; brighter than *Bridesmaid*. A rapid grower, producing its flowers on long, straight stems. Thousands of it are now being grown for cut-flowers. 15c.

Coronet. (Hybrid Tea.) Probably the most popular and most satisfactory rose for bedding and pot culture. In bloom continually from smallest plants up. Form of flower is full and wonderfully double. Color deep rich carmine in the bud, becoming soft rich pink in the fully expanded flower. 20c.

Princess of Naples. (Hybrid Tea.) Flowers are borne with the freedom of Tea Roses on long, stiff stems. Color, satiny pink, shaded silvery rose; foliage heavy deep green. One of the finest introductions of recent years. Is pronounced by many an improved *La France*. 35c.

Sylph. Ivory white with clear rose center. A delicately colored free flowering Rose, most beautiful when half expanded. 15c.

CRIMSON RAMBLER.

NEW RAMBLER ROSE—PSYCHE.

A seedling of the famous Crimson Rambler. Blooms in clusters of from 8 to 25 flowers each, of a delicate rosy pink shade, suffused salmon and yellow at the base. Of vigorous climbing habit, making strong shoots 8 to 10 feet long in a single season. 25c.

RAMBLER ROSES.

This set of roses has practically displaced the common hardy climbing roses and are being planted everywhere. They are perfectly hardy and may be trained to climb anywhere, fastened to the side of a building or porch pillar or trained to a trellis. In growth they are strong and vigorous, often making a growth of 10 to 12 feet in a single season, with heavy canes one-half inch in diameter.

Crimson Rambler. One of the grandest hardy roses ever introduced. Flowers are glowing crimson, produced in immense panicles, some of which have measured nine inches long and seven inches across, covering the plant from the ground to tips of branches. 15c. Strong two-year-old plants, 35c.

THREE SOUPERT ROSES.

For pot culture or bedding there are no more satisfactory roses than these small flowered free blooming roses. They are hardy enough to withstand any ordinary winter without protection, and bloom with a freedom exceeding that of any other rose. Used largely for cemetery planting as they are never without some display of flowers.

Clotilde Soupert. The best known and most popular Polyantha. It is as free blooming as a rose can be, commencing to bloom when but three or four inches high, and is never after without bloom if kept in a healthy growing condition. The full double flowers are produced in sprays of three or more and are of the finest imaginable form. The outer petals are pearl white, shading to a center of rosy pink, but vary sometimes from pure white to silvery rose on the same plant. 10c.

Pink Soupert. This is a worthy companion plant for Clotilde Soupert, and is already meeting with immense sale. It is as free blooming as it is possible for a rose to be, throwing up cluster after cluster of deep, rich pink flowers. We regard it as one of the best hardy pink bedding roses. 10c.

Mosella. (Yellow Soupert.) Combines the form and size of the Tea Roses with the free flowering qualities and branching habit of the Polyanthas, making it a grand rose for summer bedding or for pot culture in winter. Light yellow at center, shading to creamy white at edge of petals. 10c.

HYBRID JAPAN PLUMS.

All the sorts we offer are the productions of Luther Burbank of California who has produced thousands of crossbred seedlings, the ones offered being the best of all. While none of them have been thoroughly tested in the east they have all fruited in different sections and are of great promise; we believe they should be tried wherever plums can be grown. Descriptions given are largely Mr. Burbank's.

Apple. One of a lot of over 25,000 seedlings that produced an enormous crop when two years old; Named because of its close resemblance to an apple in general appearance, form, color and rare keeping qualities. Fruit averages about 2½ inches in diameter, deep reddish purple. The rich, sweet or sub-acid flesh is rather firm, pale red; nearly freestone. Ripens soon after Burbank. Tree is a fine strong grower, with peculiar light brown bark. 35c; 3 for \$1.00.

America. This Plum is a Robinson-Botan cross, combining the quality and size of the Japanese, with the hardness of our native. Fruit is larger than the average Japan and four to sixteen times as large as the popular native sorts. Color glossy coral red, flesh light yellow, moderately firm, of excellent quality, ripens two or three weeks before Burbank, a splendid keeper. Should prove hardy and succeed wherever plums can be grown. 35c; 3 for \$1.00.

Bartlett. Strong upright growing tree with very glossy dark green foliage; very productive and usually fruits abundantly the second season. Fruit medium size, perfect freestone, dark crimson with flakes and dots of yellow, white bloom; flesh yellow, juicy; quality, flavor and fragrance, closely

resembles the ever popular Bartlett Pear, but even more delicious; ripens just before Burbank. Probably too soft for long shipments, but all that can be desired for home use and nearby market. 50c.

Climax. Fruit heart-shaped, as large as Wickson and more highly colored, so fragrant that a whole home is perfumed with a single fruit; delicious as could be desired or imagined, and above all ripens before any other good plum and nearly a month before Wickson. Tree extremely vigorous, rather upright grower with strong branches and very large leaves. Productive as Burbank, four or five times as large, two or three weeks earlier and much more highly colored. 60c.

Chaleo. Tree a tremendous grower and unsurpassed in productiveness, hardy; it must supplant P. Simoni and will prove profitable in most sections where that variety is a failure. Fruit ripens just before Burbank; is large, flat, deep reddish purple; flesh yellow, very sweet, rather firm, exceedingly fragrant, seed small. A superior shipping sort, ripening well when picked green and keeps nearly a month. 35c; 3 for \$1.00.

Sultan. Prof. Van Deman says: "Sultan is my choice of all the new Plums which I have tested. It is a cross between Wickson and Satsuma; large, being over 2 inches in diameter and nearly round in shape. The surface is smooth, dark wine-red or garnet and very handsome. The flesh is garnet color, too, and rich-looking. In flavor it is excellent, being tart enough, yet not sour, but a delicious sub-acid. No Plum that I have eaten is better, and when cooked it could scarcely be equalled." Exceedingly productive, ripening a week before Burbank; falls like apples as soon as ripe; a great keeper. A basket of these Plums would attract instant attention anywhere by their unusual size and remarkable beauty of form and color. 60c.

Shiro. A combination of Robinson, Myroblan and Wickson. A strong grower, wood hard and wiry, ripening early in fall; should prove of great value where it is too cold for most of the best sorts. Fruit is produced in profusion, medium to large, clear light yellow with thin white bloom, so transparent the pit can be seen through the flesh, which is firm, juicy, rich, pleasant sub-acid; ripens two weeks before Burbank and nearly as productive. 60c.

JAPAN OR ORIENTAL PLUMS.

All goods ordered from this list must be sent by express or freight, customers paying charges on receipt of goods. All heavy trees in large amounts should be sent by freight, as charges are so much less, and our perfect packing admits a long journey without injury to the trees. Always give full and explicit shipping directions, as our responsibility ends on delivery of trees in good condition to the freight office.

We shall be pleased to quote prices to anyone desiring different sizes or stock in larger quantities than offered herein. In sending list state definitely the number of each variety and size wanted.

For varieties and description see preceding pages, or for more extended descriptions see Catalogue No. 1, which will be mailed on receipt of 10c.

We guarantee all stock to be up to size and grade specified in list, to be in good condition and carefully packed; this guarantee holds good only when prompt notification on arrival of stock is sent us, stating plainly any errors or cause for complaint.

Our Nurseries have been thoroughly inspected and found free of San Jose scale and other injurious insects and diseases. A certificate of inspection will be attached to all shipments.

TERMS—Net cash with order. No discounts allowed. 5 at 10 rates, 60 at 100 rates; but if remittance amounts to \$25 and up, everything at lowest rate quoted in this Price List, both fruit and ornamental.

Remember that we employ no agents, are responsible only for orders sent to us through the mail or delivered in person. No charge for packing or delivery at express office or railway station here.
